

SOLVENT DEGREASER

Epochem 530 solvent degreaser is designed to meet stringent requirements of an oil and grease solvent and still maintain corrosion inhibitor properties on metals and steel surfaces. It incorporates a unique solvent based to penetrate oil and grease bound dirt. Epochem 530 also contains emulsifier which permits easy removal with water.

Performance.

Epochem 530 solvent degreaser is formulated with a unique low volatility, low flammability solvent. It is much less likely to ignite when it is applied to hot surfaces.

Product losses through evaporation are significantly reduced. This quality reduces vapour inhalation and improves cost effectiveness.

Premium performance in removal of oil and grease bound dirt.

Provides temporary corrosion protection, due to its slow rate of evaporation.

Premium performance in safety, through use of high flash point and low volatility solvent.

Easy to remove with water

Pleasant fragrance.

Main Applications

Epochem 530 solvent Degreaser may be applied by spraying, brushing or swabbing, followed by removal with water

Properties	Epochem 530
Appearance	Clear liquid
Odour	Pleasant
Solubility	Negligible

These qualities are typical of current production, variations in characteristics may occur based on Epochem specifications.

EPOCHEM®

530

Health, Safety and Environment

Epochem 530 solvent degreaser is unlikely to present significant health and safety hazards when properly used in the recommended application.

Avoid long time contact with skin. Use impervious gloves. After skin contact wash immediately with soap and water.

Protect the Environment

Take used Epochem 530 fluid to authorized collection point for proper disposal. Guidance on Health safety is available on the Material Safety Data sheet.
